Dragon NaturallySpeaking 10 Legal

Speech Recognition for the Legal Community

Thousands of legal professionals worldwide have already adopted Dragon® NaturallySpeaking® 10 Legal to increase productivity and reduce

transcription costs. Law firms and legal departments can create contracts, dictate briefs, and draft court documents or email messages three times faster than typing – all with up to 99% accuracy.

Dragon NaturallySpeaking 10 Legal offers a preconfigured legal vocabulary that includes more than 30,000 legal-specific terms and phrases, and it even formats citations. Lawyers can browse through briefs or consult notes while entering text directly into virtually any Windows-based application, including the Microsoft Office suite and most case management programs.

ACCURATE SPEECH RECOGNITION FOR PC APPLICATIONS

Dragon NaturallySpeaking 10 Legal offers unprecedented speed and accuracy. Users can create documents and emails more than three times faster than typing – with up to 99 percent accuracy – right out of the box. Plus, the software further tunes itself to each speaker over time, automatically or when a recognition error is corrected. Users can dictate, edit and navigate menus in virtually any Windows application.

DICTATE INTO A HANDHELD RECORDER FOR LATER TRANSCRIPTION

Users on the go can dictate into any Nuance-certified digital recorder for automatic transcription when it is synced with a PC. The transcription can be quickly and easily passed along to a legal secretary for review and correction.

IMPROVED THIRD-PARTY CORRECTION

NEW Both the audio and the transcribed text of a digital voice recording can be sent to a transcriptionist for review. An Auto-Transcribe Folder Agent can manage text and synchronized audio flow for third-party review, which streamlines the process of correcting another person's dictation.

NEW With Correction Only Mode, Dragon 10 lets those who correct the dictations of others create a "no dictation available" profile, which means that they don't have to go through any kind of audio setup, no matter what dictation source the speaker used. The "correctionist" can open the synchronized dictation files to make corrections by hand, which contributes to the optimization of the speaker's profile over time.

AUTOMATE COMPLEX OR REPETITIVE DOCUMENT-CREATION TASKS WITH VOICE COMMANDS

Dragon NaturallySpeaking 10 Legal lets users (or a third-party) create custom voice commands to instantly build and format templates for contracts or other legal documents, or trigger the execution of frequent or complex computer tasks. Custom commands can be used to quickly enter frequently-used boilerplate text and images (including formatted paragraphs, bullet points, and graphics such as scanned signatures), or automate a sequence of tasks such as saving a document under a certain name then printing it and attaching it to an email.

LEGAL BENEFITS

Reduce dependency on support staff

Dragon frees support staff to leverage their specialized skills for tasks other than word processing. Whether speakers dictate to their PCs or a digital voice recorder, deferred correction is easy, and documents are finalized faster.

Cut turnaround times for documents

Improved deferred correction features streamline the editing and correction process to dramatically reduce turnaround time.

Ensure high-value staff doesn't waste time typing

Reduce overtime and staffing costs.

Streamline complex or repetitive document-creation tasks

Increase billings without increasing resources

Improve staff-to-attorney ratio; take on more clients; and outperform the competition.

DRAGON VOICE SHORTCUTS TO PERFORM TASKS FASTER THAN EVER

NEW With Dragon Voice Shortcuts for Email and Calendar, a user may say, "Send email to Jon Smith and Raphael Sanchez," and Dragon will activate his email program, create a new email and put the appropriate contact names into the "to:" box. Or to schedule a meeting, a user can say, "Schedule meeting with Jon Smith and Raphael Sanchez," and Dragon jumpstarts the process by opening a new calendar entry in Outlook and adding the selected contact(s).

NEW Dragon Voice Shortcuts for Web and Desktop Search make it faster and easier than ever to find and access information. A user says a command containing his desired search words, such as "Search the Web for financial management resources," or "Search maps for Italian restaurants in Burlington, Massachusetts," and Dragon 10 will use the default search engine and Web browser to enter his dictated term(s) in the search field and return the results. A user may also search specific sites including Google, Yahoo, eBay, Wikipedia, YouTube and more. Users can search the computer as directly as the Web, by dictating the word(s) to find in documents, emails and Web-browsing history.

FULLY NETWORK-COMPATIBLE FOR MULTIPLE USERS

Dragon NaturallySpeaking 10 Legal offers administrative tools to manage large user populations. Organizations with large deployments can centrally manage voice profiles, custom vocabularies and multiple installations. Enhanced security configuration options now provide administrators with better control of Dragon usage across the enterprise.

SYSTEM REQUIREMENTS

- CPU: Intel® Pentium® / 1 GHz processor or equivalent AMD processor. Faster processors will yield faster performance. Memory: 512 MB RAM (1 GB RAM for Windows Vista™)
- Free hard disk space: 1 GB (2 GB for localized non-English versions)
- L2 Cache: 512 KB
- Supported Operating Systems: Windows Server 2000, Windows Server 2003, Windows XP SP2 or higher - 32 bit, Windows 2000 SP4 or higher, Windows Vista™ or Windows Vista™ SP1, 32-bit
- DVD-ROM drive (required for installation)
- Microsoft® Internet Explorer 6 or higher (free download available at www.microsoft.com)
- Nuance-approved noise-canceling headset microphone (included), Creative® Labs Sound Blaster® 16 or equivalent sound card supporting 16-bit recording, speakers (required for playback of recorded speech and text to speech features)
- For Bluetooth wireless microphone support, please visit <http://support.nuance.com/compatibility/>
- A Web connection is required for activation

During the install process the software checks to make sure your system meets these minimum requirements. If you do not meet the requirements, the software will not be installed.

*** This edition of Dragon does not support dictation directly into Electronic Medical Record (EMR) Systems. For EMR support, please use Dragon Medical Edition.**

Recommended Specifications

- CPU: Intel® Pentium® / 2.4 GHz processor (1.6 GHz dual core processor) or equivalent AMD processor
- Memory: 1 GB RAM
- L2 Cache: 1 MB
